PROFESSIONAL SUMMARY

B. Tech (AI & ML) student with hands-on project experience in SQL, Python, Excel and Power BI. Built an end-to-end analysis of 96K e-commerce orders, from SQL Server queries to an interactive Power BI dashboard with business recommendations. Seeking a Data Analyst internship or entry-level role to apply analytical and reporting skills to real business data.

TECHNICAL SKILLS

Programming & Libraries : Python, Pandas, NumPy, Matplotlib

Data Analysis, Visualization & Databases : SQL, Excel, Power BI, Oracle SQL, MySQL, Microsoft SQL Server

Development & Productivity Tools : Git, GitHub, Microsoft Office

EDUCATION

B. Tech in Artificial Intelligence & Machine Learning, *Jayamukhi Institute of Technological Sciences, Expected 2027*, CGPA: 8.68

Intermediate (MPC), *MJPTBCWR Jr. College*, *2023,* Score: 92.2%

SSC (Class X), *MJPTBCWREIS, 2021,* CGPA: 10.0

PROJECTS

Olist E-commerce Performance & Delivery Analysis | dameruppulaajay43/olist-ecommerce-analysis

• Analyzed 96K+ delivered orders (R$ 15.4M revenue) across 8 related tables using T-SQL (joins, CTEs, window functions) to answer five business questions.

• Identified Rio de Janeiro as a high-volume problem market, with 13.5% late orders vs 5.9% in São Paulo.

• Found that late deliveries (8% of orders) were linked to review scores 1.7 points lower (2.6 vs 4.3), and that 97% of customers never reordered.

• Built a 2-page Power BI dashboard (DAX measures, slicers, date table); loaded the data with Python (Pandas, SQLAlchemy).

Swiggy Sales & Customer Insights Dashboard | *Excel Data Analysis Project*

• Built Excel dashboard analyzing ₹53M+ sales & 197K+ orders using Pivot Tables, XLOOKUP, and charts to highlight trends and customer insights.

• Cleaned and structured raw Excel dataset (₹53M+ sales, 197K+ orders, 5.59K ratings) for analysis.

• Applied advanced Excel functions (Pivot Tables, XLOOKUP, INDEX-MATCH, nested IFs) to build interactive dashboards.

Drone & CCTV Security Surveillance System | *GenAI Buildathon Project*

• Built a real-time threat-detection prototype with OpenCV and Python that processes live video streams and triggers automated alerts.

• Built autonomous flight simulation workflows with Mission Planner SITL, reducing system testing time by 30%.

True Jobs Solutions | *Recruitment Platform Project*

• Built backend workflows and applicant tracking modules using Python and SQL for 500+ simulated job listings.

• Designed relational database schemas and optimized SQL queries in MySQL to improve search performance.

• Implemented candidate-job matching filters to support efficient recruitment workflows and data-driven decisions.

ACHIEVEMENTS

• Selected to National Level at OpenAI Academy × NxtWave GenAI Buildathon (India AI Impact Summit 2026).

CERTIFICATIONS

• SQL and Relational Databases — IBM Skills Network (CognitiveClass.ai)

• Data Analytics Job Simulation — Forage (Deloitte Australia)

• Introduction to Data Science — Infosys Springboard
